To: Crosscut Sawyers and Managers

Now that field season is over I invite you to send me your crosscut saws for professional straightening, tuning and sharpening. In the business since 1988, I have sharpened well over 1,000 saws for dozens of public agency units and private owners. I do custom tuning for specific types of sawing. I can repair and replace broken teeth on quality saws. I can fit your saw with a custom sheath. I may also be able to help you procure more saws. I guarantee your satisfaction. Give me a call!

You may ship your saws to me any time. Don't hesitate – my sharpening season is limited. You may ship saws to my Main Street address via UPS or Federal Express, Or to PO Box 91 via the US Postal Service. Please enclose your phone # and /or E-mail address, shipping address and mailing address if different. Please package saws, without handles, securely in cardboard or bolted between strips of plywood. Check out my website 'saw care information' page for tips on packaging.

I charge by the hour. My service will cost you \$9.00 to \$40.00 per foot of saw depending on condition. I can quote a price when I see your saw. I invoice by e-mail and I accept credit card payments. I offer a discount for check payment.

I'm pleased to announce that my 'retirement' from the U.S. Forest Service has been very satisfying -- and busy! I have jumped at the many opportunities to continue working with my past colleagues as an instructor, special project leader and volunteer. And I have been fortunate to continue making new associations with trail crews, sawyers, educators and other traditional tool enthusiasts. I am expecting next year to be just as busy.

Please pass this letter on to anyone else who might need saws sharpened.

TIME TO THINK ABOUT
